٠,

This structure is one of the few examples of an antebellum plantation house in the project area. It is one of two structures in the project area with lath and plaster walls, and contains rare examples of original interior finish. It is the only house in the project area with a two-story colonnaded porch, a rare feature in this region. Preservation of this building would be extremely difficult due to its advanced deterioration.

THE MEASURE CONTINUES. 11. (continued) Lowndesville, proceed south on Abbeville Co. 65 1.7 miles to the intersection with Abbeville County Road 64, then east on Co. 64 0.6 mile to the intersection with Abbeville County Road 140, then southeast on Co. 140 1.6 miles to the site.

Although this structure is extremely deteriorated, the interior and exterior finish that remain intact reveal both important construction techniques and changes made over time. The building is an excellent example of early log construction, displaying superb one-half dovetail joinery of massive hewn logs. The frame additions and enclosed dogtrot exemplify the adaptation of an early structure to later styles and needs for expansion. Although this structure is outside the acquisition area, it has been included in this inventory because of its historic merit

and proximity to the acquisition line.

11. (continued) to the intersection with Abbeville County Road 228, then northeast on Co. 228 0.4 mile to an unpayed private drive then southeast 0.1 mile on the private drive to the site.

17. (continued) deteriorated and overgrown.

ı

ا ا

.

This structure is a good example of a post Civil War cattle or horse barn. The hewn frame members of the structure were probably incorporated from an earlier structure. This barn appears to have been associated with a later frame house, CA. 1875-1885, now collapsed. Although this structure is outside the acquisition area, it has been included in this inventory because of its relationship to Site AB1227-A.

11. (continued) Abbeville County Road 228, then northeast on Co. 228 0.4 mile to an unpaved private drive, then southeast 0.1 mile on the private drive to the &ite.

This structure is unusual in the use of hewn posts. It is likely that these posts were incorporated from an earlier structure, and that this well house was contemporary to a later frame house, CA. 1875-1885, now collapsed. Although this structure is outside the acquisition area, it has been included in this inventory because of its relationship to site AB1227-A.

11. (continued) County Road 228, then northeast on Co. 228 0.4 mile to an unpaved private drive, then southeast 0.1 mile on the private drive to the site.

AS SEVILLE COLLIFTY ROSD IZS

### Significance

This small barn is a typical example of a late nineteenth century barn of which many examples exist throughout the project area and surrounding region. The significance of this building has been greatly undermined by the loss of the older, major buildings of this complex.

## THE RESERVE OF THE PARTY OF

11. (continued) the intersection with Abbeville County Road 123, then generally west on Co. 123 1.2 miles to the site.

# Significance

This small barn is a typical example of a late nineteenth century barn of which many examples exist throughout the project area and surrounding region. The significance of this building has been greatly undermined by the loss of the older, major buildings of this complex.

Significance

Composed of massive hewn logs with one-half dovetail joinery. This well preserved farmhouse is an excellent example of the construction skill of the early settlers of Abbeville County. This is certainly the most impressive log dwelling in the project area, if not in the whole of Abbeville County. The farm has been in the possession of the Hutchison family since 1877, though the original two buildings may date from as early as CA. 1810-1820.

## MATERIAL RESIDENTIAL ES

11. (continued) then southwest on Co. 81 1.0 mile to the intersection with Abbeville County Road 93, then south on Co. 93 1.0 mile to the site.

Significance

This small smokehouse is possibly the only outbuilding left standing from the original Hutchison Farm Complex. The log construction with one-half dovetail joinery indicates that it was built during the same period as the Hutchison house, Site AB1301-A, CA 1810-1820.

### 2 THE POST OF PARTY AND PROPERTY.

11. (continued) then southwest on Co. 81 1.0 miles to the intersection with Abbeville County Road 93, then south on Co. 93 1.0 mile to the site.
